

Hi, please do this before the workshop and tell me if it worked.

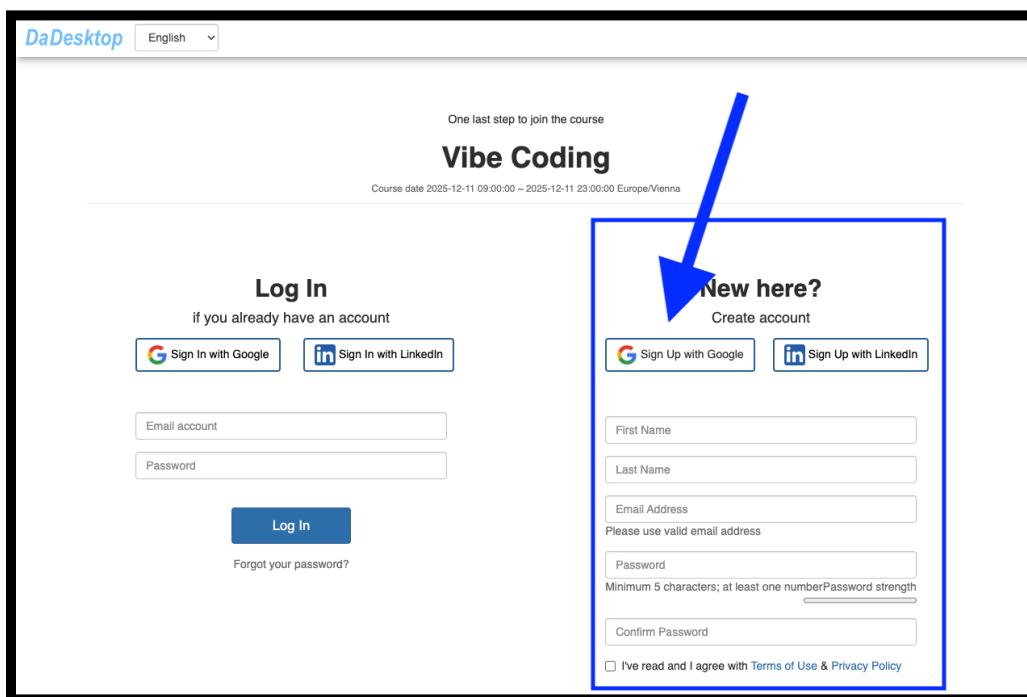

You are getting a complete preconfigured computer in the cloud for this workshop. Working in every modern browser. So the main thing is for this workshop to get this working. After this the workshop is a breeze as the AI will do everything.

Please also in one go as every time you start before the workshop starts there is a few dollar costs for me.

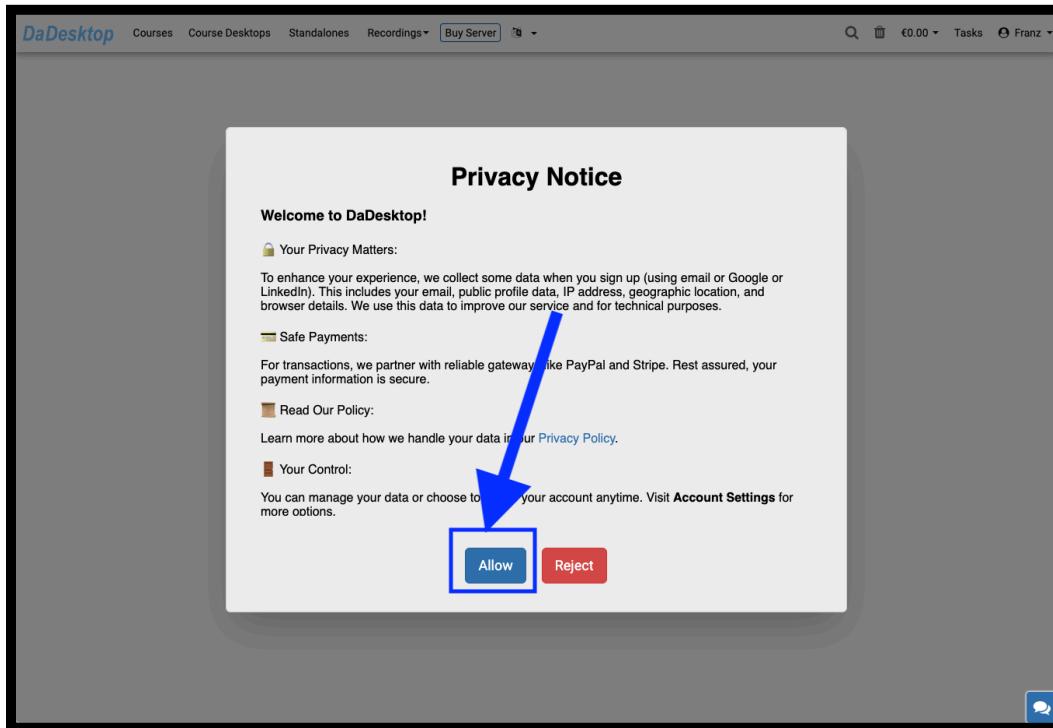

Please follow this guideline in detail. Please do this in the Chrome Browser. On the computer you will bring to the workshop.

Open this link: <https://dd4t.dadesktop.com/da/join/QL22133> Please only register 1 person per participant.

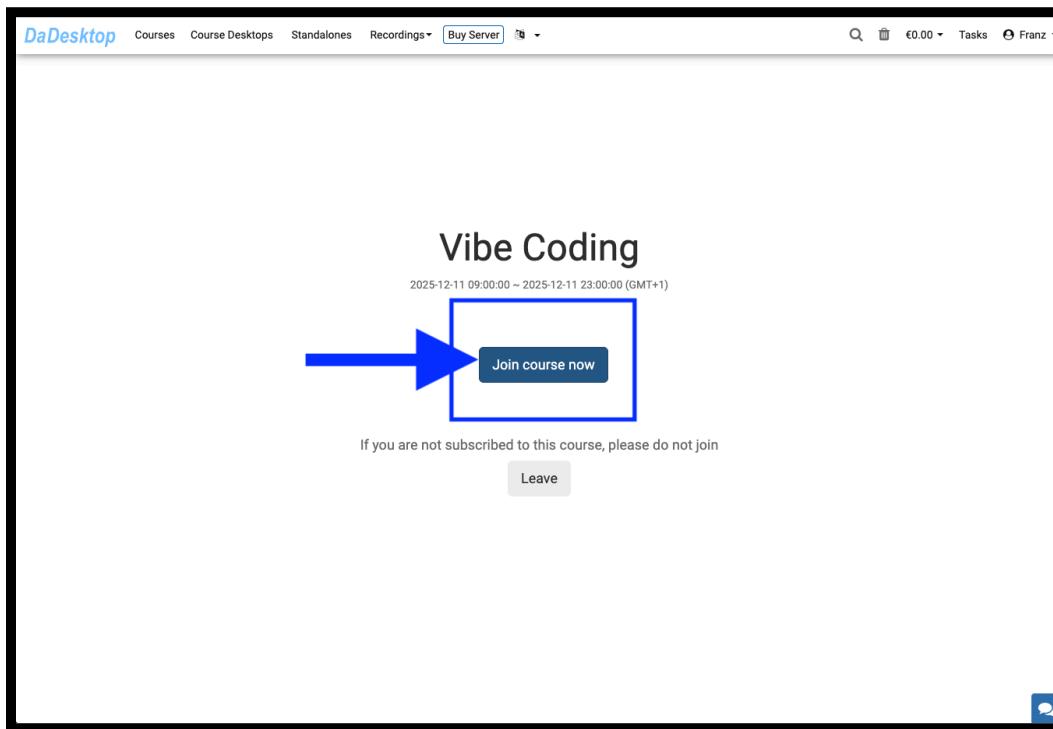

Please login.

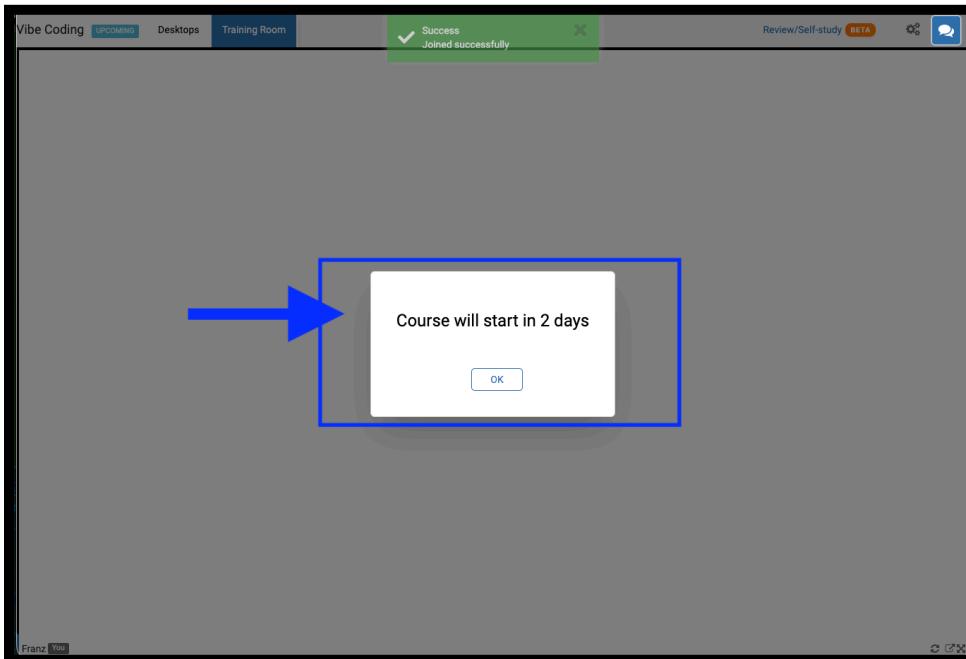

Please accept privacy stuff.

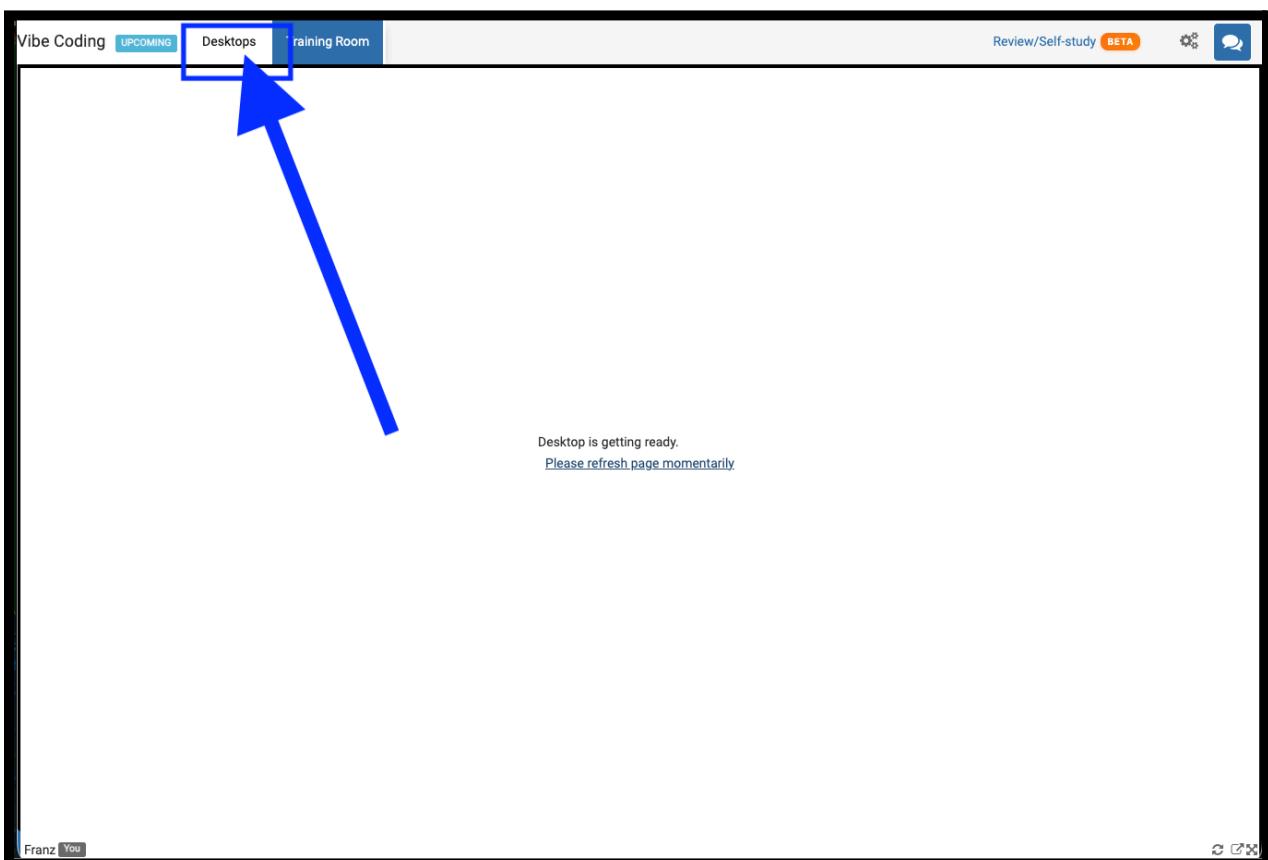

Join the vibe!

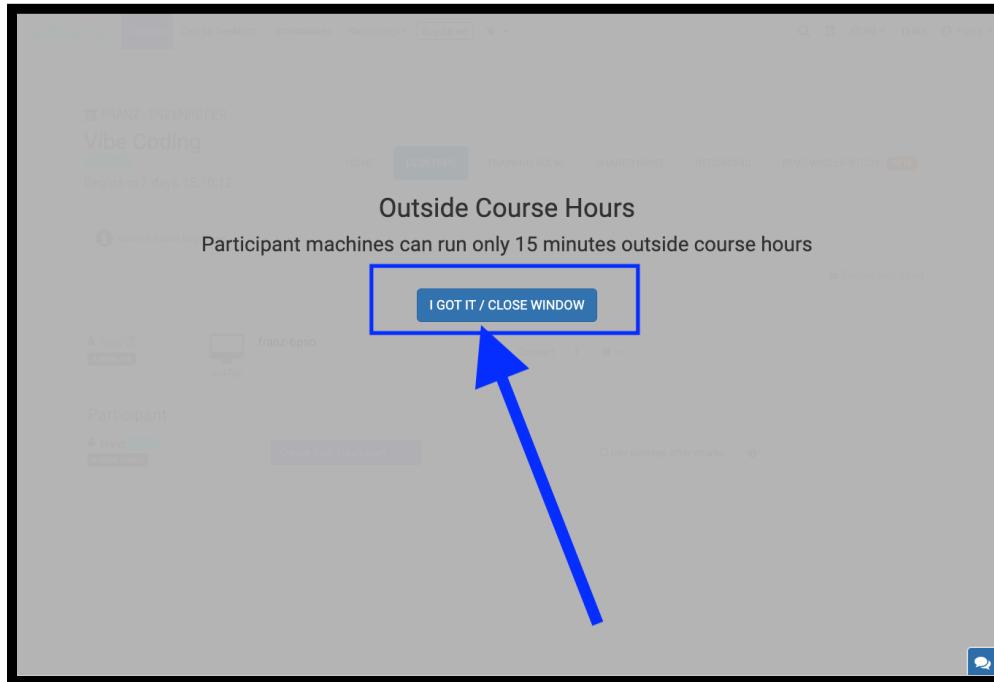

Click OK!

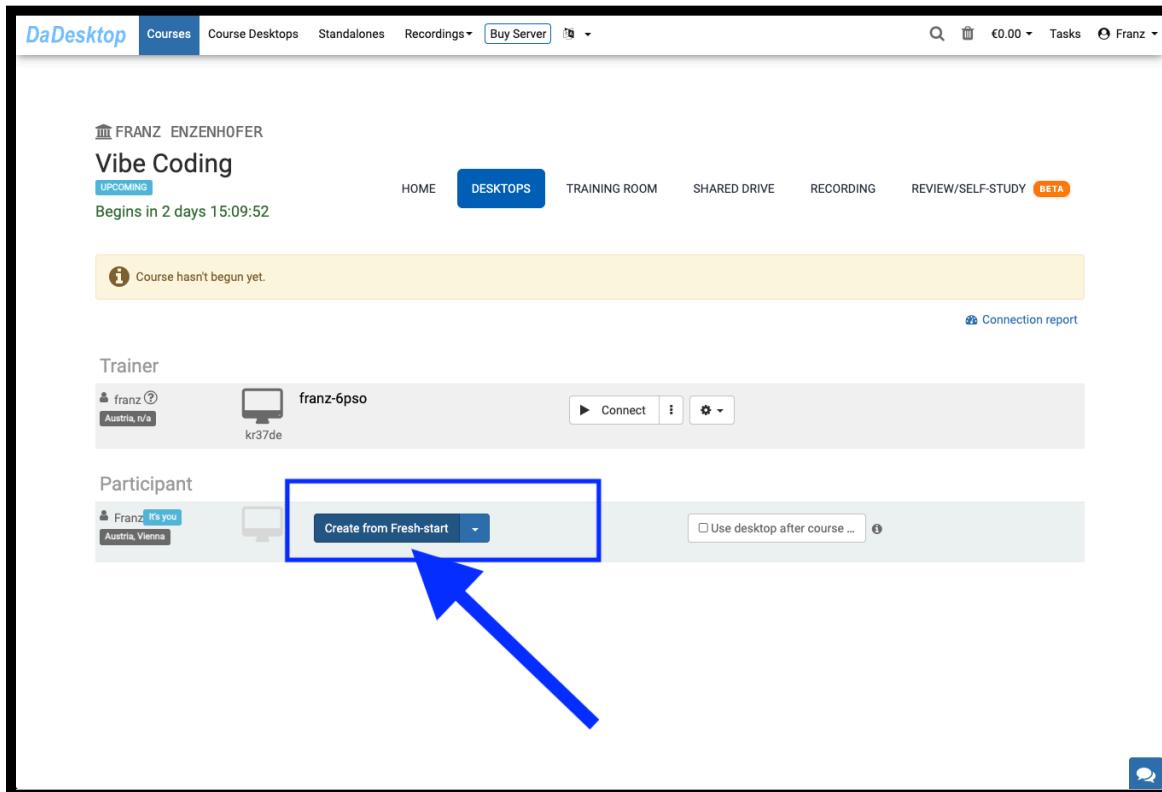

On the top right click on Desktop!

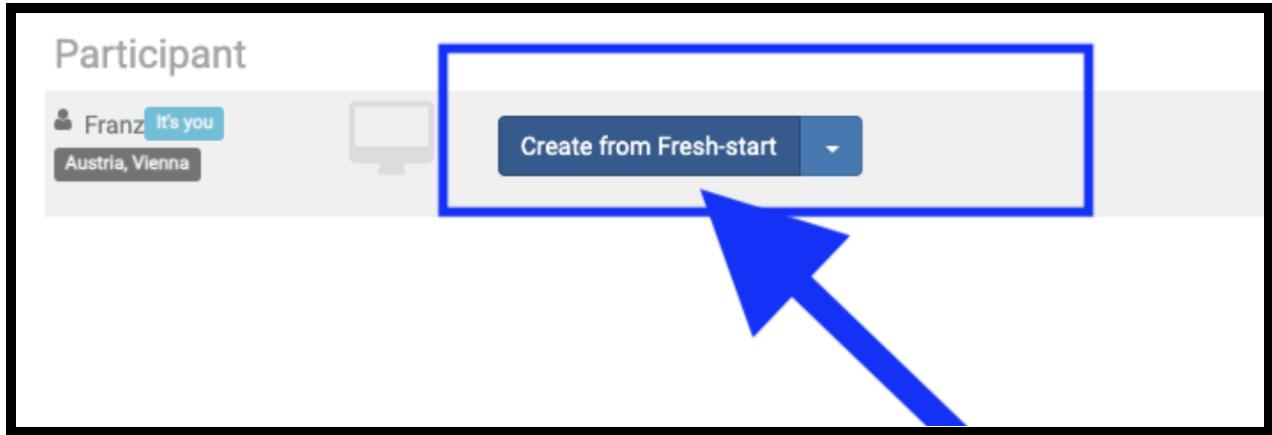

Click "I got it"

Now go the the second entry and click: Create from Fresh Start!

After this click again "I got it"!

A screenshot of a participant's desktop interface. At the top, there's a navigation bar with tabs like "Course", "Course Desktops", "Standalones", and "Recordings". A green success message box is displayed, stating "Success" and "Desktop restored". Below the navigation bar, there's a course header for "Vibe Coding" with a start date of "Begins in 2 days". A large blue rectangular box highlights a central message area. Inside this box, the text reads "Outside Course Hours" and "Participant machines can run only 15 minutes outside course hours". At the bottom of this message area is a blue button labeled "I GOT IT / CLOSE WINDOW". A large blue arrow points from the bottom right towards this button. At the very bottom of the screen, there's a footer with icons for "Connect", "Use desktop after course", and a note about machine run times.

Now click "Connect" in your Participant row to connect.

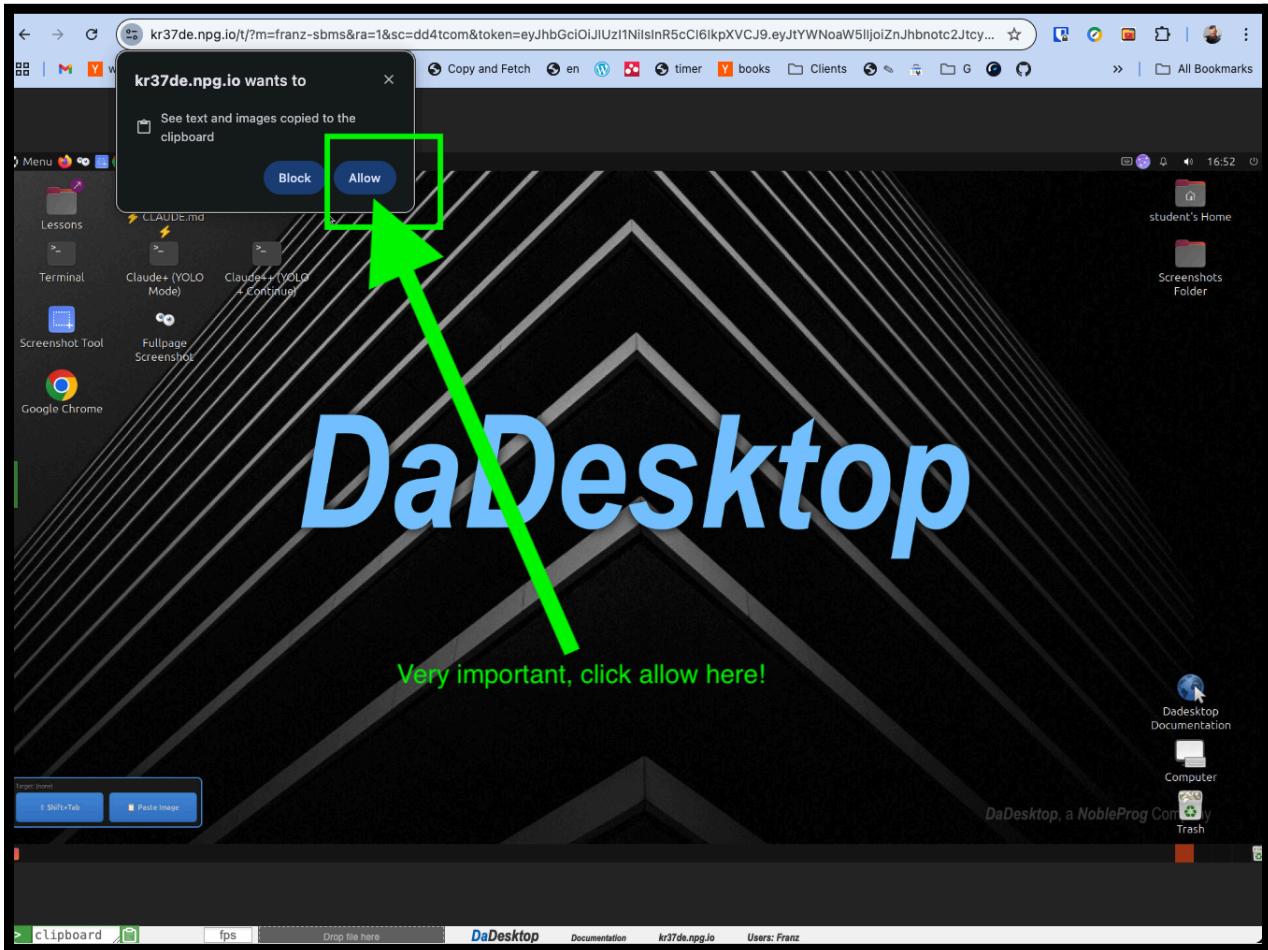

The screenshot shows the DaDesktop web interface. At the top, there's a navigation bar with links like 'Courses', 'Course Desktops', 'Standalones', 'Recordings', 'Buy Server', and user information. Below the navigation, there's a course header for 'Vibe Coding' by 'FRANZ ENZENHOFER'. The 'DESKTOPS' tab is selected. Under the 'Participant' section, there's a list of users: 'franz-? Austria, n/a' and 'franz-sbms Austria, Vienna'. The 'franz-sbms' row has a 'Connect' button highlighted with a blue box and a blue arrow pointing to it. There's also a note: 'Machines can only run for 15 minutes...more'.

now you will see some line of text on the screen, please wait a little. then

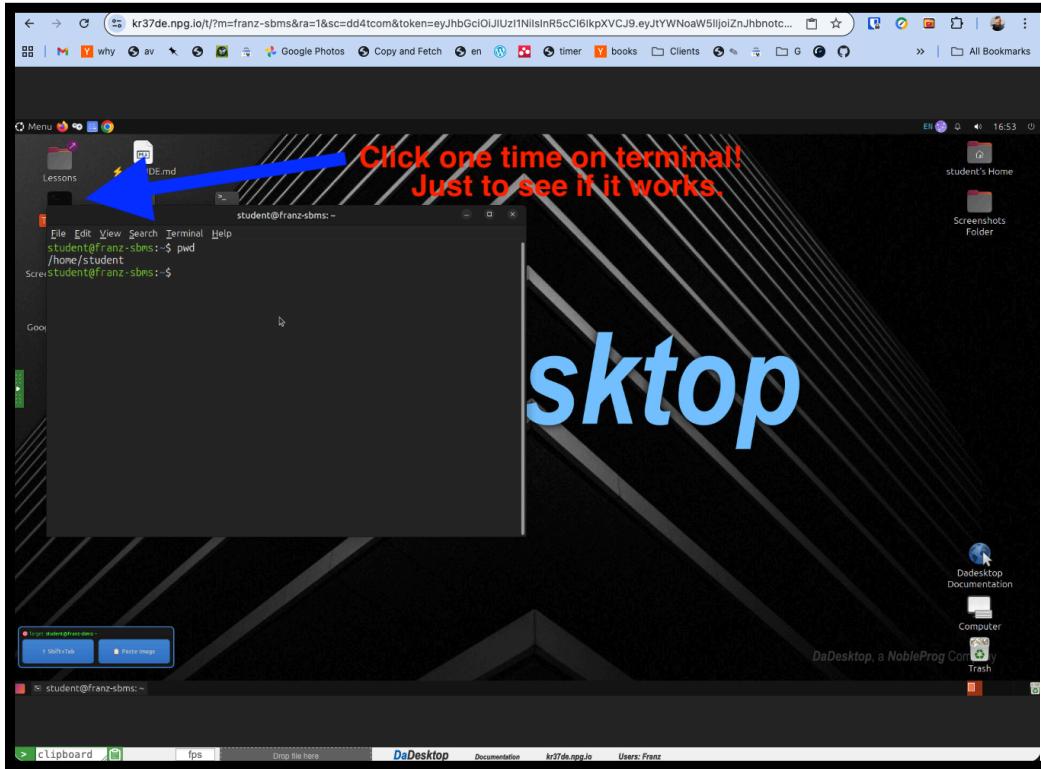

if you are here, all is good. nearly there!

Click on Allow! Very very important. Otherwise copy&paste will not work properly.

Now just click on the icon that says 'Terminal" to be super super sure it all works!

If this all works, super. If not, please mail me via [fe@f19n.com](mailto:fe@f19n.com)

Now the only thing left is to turn it off. Thx a lot.
